

The New England Shutter Company Ltd

The New England Shutter Company makes shutters as a traditional joinery company would have done years ago, using time honoured methods and fine craftsmanship. Attention to detail goes beyond our design process through to the personal service we provide to ensure complete customer satisfaction.

From Monaco to Zanzibar, New York to Paris, our shutters are the first choice for architects, designers, discerning homeowners and commercial clients. They combine traditional elegance with contemporary style, designed for modern living. We deliver and install around the world.

TNESC is the only UK Company to design and manufacture shutters from responsibly sourced timbers. Our Tulipwood comes from the Appalachian Mountains in the eastern New England region of America. Our shutters are caringly hand sanded and hand sprayed to give a fine furniture grade finish which allows you to see the wood grain on the final finish.

To produce truly bespoke shutters, we employ only skilled craftsmen in the joinery workshop we own in Dubai. This enables us to offer customised manufacturing and flexibility in every component of your shutter and a short lead time.

As pioneers in shutter design, we were the first to design and manufacture shutters with a concealed tilting mechanism. We continue to create innovative shutter designs as we are the only company that can vary every element within the design of a shutter; from the blade size, the distance between the blades, rail and side stile sizes, to the depths and height of a midrail. This flexibility allows us to design a shutter that is made to fit, not made to measure.

A unique variety of finish types are available from TNESC: painted (colour match service), fire

retardant, sandblasted, limed wax, fabric and natural woods. To preserve the natural look of the timber, stained, oiled or lacquered finishes are applied by hand to a variety of solid woods such as Ash, Oak, Walnut, Maple, Tulipwood, Iroko and Teak.

Beautiful stitched faux leather and suede shutters are exclusive to The New England Shutter Company. Our experienced tailors machine stitch the fabric and hand cover each tulip wood shutter with incredible attention to detail offering both luxury and durability.

Investing in shutters is as rewarding as investing in a piece of bespoke furniture as we design to enhance the architectural and interior design features within your living areas or commercial space. Whatever your specific needs are, we can design and manufacture shutters to meet them. ■
